

Title

Built a centralized solution for CPG vendors to leverage POS data for enabling better decisions

Summary

Tredence partnered with a logistics provider in Midwest US to help its customers better reconcile delivery over-ages & under-ages. Data from retailers' POS systems were combined with logistics providers' TMS data to provide a complete picture of last-mile delivery

Approach

1	Reconciliation of invoicing was validated
2	Identified the root cause of delivery over-ages or under-ages reported by retailers
3	Bridged in the gap by comparing the historical data and detect the discrepancy with respect to inv
4	Developed a design to build a one stop solution to help retailers for visualize the data

Key Benefits

1	User Experience Reconciliation down from 2 weeks to 2 days
2	Easier to Use Efficient & Responsive visualizations
3	Scalability Factor: 3x data processed in quick turn around time, improved data speed from 15mins to 2secs

Results

1	Enterprise ready Web Based Solution
2	Solution enabled CPG vendors to easily analyze to drive more sales, decrease cost, improve profitability & reduce out of stocks
